### **ARTICLES**

#### **General Terms and Conditions:**

- A. **Governing Law and Venue:** This Contract has been negotiated and executed in the state of California and shall be governed by and construed under the laws of the state of California. In the event of any legal action to enforce or interpret this Contract, the sole and exclusive venue shall be a court of competent jurisdiction located in Orange County, California, and the parties hereto agree to and do hereby submit to the jurisdiction of such court, notwithstanding Code of Civil Procedure Section 394. Furthermore, the parties specifically agree to waive any and all rights to request that an action be transferred for adjudication to another county.

- B. **Entire Contract:** This Contract contains the entire Contract between the parties with respect to the matters herein, and there are no restrictions, promises, warranties or undertakings other than those set forth herein or referred to herein. No exceptions, alternatives, substitutes or revisions are valid or binding on County unless authorized by County in writing. Electronic acceptance of any additional terms, conditions or supplemental Contracts by any County employee or agent, including but not limited to installers of software, shall not be valid or binding on County unless accepted in writing by County's Purchasing Agent or designee.

If no permit numbers are shown, sales tax will be deducted from payment. - E. **Delivery:** Time of delivery of goods or services is of the essence in this Contract. County reserves the right to refuse any goods or services and to cancel all or any part of the goods not conforming to applicable specifications, drawings, samples or descriptions or services that do not conform to the prescribed statement of work. Acceptance of any part of the order for goods shall not bind County to accept future shipments nor deprive it of the right to return goods already accepted at Contractor's expense. Over shipments and under shipments of goods shall be only as agreed to in writing by County. Delivery shall not be deemed to be complete until all goods or services have actually been received and accepted in writing by County.
- F. **Acceptance Payment:** Unless otherwise agreed to in writing by County, 1) acceptance shall not be deemed complete unless in writing and until all the goods/services have actually been received, inspected, and tested to the satisfaction of County, and 2) payment shall be made in arrears after satisfactory acceptance.
- G. **Warranty:** Contractor expressly warrants that the goods covered by this Contract are 1) free of liens or encumbrances, 2) merchantable and good for the ordinary purposes for which they are used, and 3) fit for the particular purpose for which they are intended. Acceptance of this order shall constitute an agreement upon Contractor's part to indemnify, defend and hold County and its indemnities as identified in paragraph "Z" below, and as more fully described in paragraph "Z," harmless from liability, loss, damage and expense, including reasonable counsel fees, incurred or sustained by County by reason of the failure of the goods/services to conform to such warranties, faulty work performance, negligent or unlawful acts, and non-compliance with any applicable state or federal codes, ordinances, orders, or statutes, including the Occupational Safety and Health Act (OSHA) and the California Industrial Safety Act. Such remedies shall be in addition to any other remedies provided by law.

- H. **Patent/Copyright Materials/Proprietary Infringement:** Unless otherwise expressly provided in this Contract, Contractor shall be solely responsible for clearing the right to use any patented or copyrighted materials in the performance of this Contract. Contractor warrants that any software as modified through services provided hereunder will not infringe upon or violate any patent, proprietary right, or trade secret right of any third party. Contractor agrees that, in accordance with the more specific requirement contained in paragraph "Z" below, it shall indemnify, defend and hold County and County Indemnitees harmless from any and all such claims and be responsible for payment of all costs, damages, penalties and expenses related to or arising from such claim(s), including, costs and expenses but not including attorney's fees.
- I. **Assignment:** The terms, covenants, and conditions contained herein shall apply to and bind the heirs, successors, executors, administrators and assigns of the parties. Furthermore, neither the performance of this Contract nor any portion thereof may be assigned by Contractor without the express written consent of County. Any attempt by Contractor to assign the performance or any portion thereof of this Contract without the express written consent of County shall be invalid and shall constitute a breach of this Contract.
- J. **Non-Discrimination:** In the performance of this Contract, Contractor agrees that it will comply with the requirements of Section 1735 of the California Labor Code and not engage nor permit any subcontractors to engage in discrimination in employment of persons because of the race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, or sex of such persons. Contractor acknowledges that a violation of this provision shall subject Contractor to penalties pursuant to Section 1741 of the California Labor Code.
- K. **Termination:** In addition to any other remedies or rights it may have by law, County has the right to immediately terminate this Contract without penalty for cause or after 30 days' written notice without cause, unless otherwise specified. Cause shall be defined as any material breach of contract, any misrepresentation or fraud on the part of the Contractor. Exercise by County of its right to terminate the Contract shall relieve County of all further obligation.
- L. **Consent to Breach Not Waiver:** No term or provision of this Contract shall be deemed waived and no breach excused, unless such waiver or consent shall be in writing and signed by the party claimed to have waived or consented. Any consent by any party to, or waiver of, a breach by the other, whether express or implied, shall not constitute consent to, waiver of, or excuse for any other different or subsequent breach.
- M. **Independent Contractor:** Contractor shall be considered an independent contractor and neither Contractor, its employees, nor anyone working under Contractor shall be considered an agent or an employee of County. Neither Contractor, its employees nor anyone working under Contractor shall qualify for workers' compensation or other fringe benefits of any kind through County.

in a good and workmanlike manner; shall furnish all necessary labor, supervision, machinery, equipment, materials, and supplies, shall at its sole expense obtain and maintain all permits and licenses required by public authorities, including those of County required in its governmental capacity, in connection with performance of the work. If permitted to subcontract, Contractor shall be fully responsible for all work performed by subcontractors.

- O. **Insurance Requirements:** Prior to the provision of services under this Contract, the Contractor agrees to purchase all required insurance at Contractor's expense, including all endorsements required herein, necessary to satisfy the County that the insurance provisions of this Contract have been complied with. Contractor agrees to keep such insurance coverage, Certificates of Insurance, and endorsements on deposit with the County during the entire term of this Contract. In addition, all subcontractors performing work on behalf of Contractor pursuant to this Contract shall obtain insurance subject to the same terms and conditions as set forth herein for Contractor.

Contractor shall ensure that all subcontractors performing work on behalf of Contractor pursuant to this Contract shall be covered under Contractor's insurance as an Additional Insured or maintain insurance subject to the same terms and conditions as set forth herein for Contractor. Contractor shall not allow subcontractors to work if subcontractors have less than the level of coverage required by County from Contractor under this Contract. It is the obligation of Contractor to provide notice of the insurance requirements to every subcontractor and to receive proof of insurance prior to allowing any subcontractor to begin work. Such proof of insurance must be maintained by Contractor through the entirety of this Contract for inspection by County representative(s) at any reasonable time.

All self-insured retentions (SIRs) shall be clearly stated on the Certificate of Insurance. Any self-insured retention (SIR) in an amount in excess of Fifty Thousand Dollars (\$50,000) shall specifically be approved by the County's Risk Manager, or designee, upon review of Contractor's current audited financial report. If Contractor's SIR is approved, Contractor, in addition to, and without limitation of, any other indemnity provision(s) in this Contract, agrees to all of the following:

- 1) In addition to the duty to indemnify and hold the County harmless against any and all liability, claim, demand or suit resulting from Contractor's, its agents, employee's or subcontractor's performance of this Contract, Contractor shall defend the County at its sole cost and expense with counsel approved by Board of Supervisors against same; and
- 2) Contractor's duty to defend, as stated above, shall be absolute and irrespective of any duty to indemnify or hold harmless; and
- 3) The provisions of California Civil Code Section 2860 shall apply to any and all actions to which the duty to defend stated above applies, and the Contractor's SIR provision shall be interpreted as though the Contractor was an insurer and the County was the insured.

If the Contractor fails to maintain insurance acceptable to the County for the full term of this Contract, the County may terminate this Contract.

**Qualified Insurer**

The policy or policies of insurance must be issued by an insurer with a minimum rating of A- (Secure A.M. County shall notify Contractor in writing of changes in the insurance requirements. If Contractor does not deposit copies of acceptable Certificates of Insurance and endorsements with County incorporating such changes within thirty (30) days of receipt of such notice, this Contract may be in breach without further notice to Contractor, and County shall be entitled to all legal remedies.

The procuring of such required policy or policies of insurance shall not be construed to limit Contractor's liability hereunder nor to fulfill the indemnification provisions and requirements of this Contract, nor act in any way to reduce the policy coverage and limits available from the insurer.

- P. **Changes:** Contractor shall make no changes in the work or perform any additional work without the County's specific written approval.

- Q. **Change of Ownership/Name, Litigation Status, Conflicts with County Interests:** Contractor agrees that if there is a change or transfer in ownership of Contractor's business prior to completion of this Contract, and the County agrees to an assignment of the Contract, the new owners shall be required under the terms of sale or other instruments of transfer to assume Contractor's duties and obligations contained in this Contract, and complete them to the satisfaction of the County.

County reserves the right to immediately terminate the Contract in the event the County determines that the assignee is not qualified or is otherwise unacceptable to the County for the provision of services under the Contract.

In addition, Contractor has the duty to notify the County in writing of any change in the Contractor's status with respect to name changes that do not require an assignment of the Contract. The Contractor is also obligated to notify the County in writing if the Contractor becomes a party to any litigation against the County, or a party to litigation that may reasonably affect the Contractor's performance under the Contract, as well as any potential conflicts of interest between Contractor and County that may arise prior to or during the period of Contract performance. - X. **Interpretation:** This Contract has been negotiated at arm's length and between persons sophisticated and knowledgeable in the matters dealt with in this Contract. In addition, each party had been represented by experienced and knowledgeable independent legal counsel of their own choosing or has knowingly declined to seek such counsel despite being encouraged and given the opportunity to do so. Each party further acknowledges that they have not been influenced to any extent whatsoever in executing this Contract by any other party hereto or by any person representing them, or both. Accordingly, any rule or law (including California Civil Code Section 1654) or legal decision that would require interpretation of any ambiguities in this Contract against the party that has drafted it is not applicable and is waived. 12. **Default – Reprourement Costs:** In case of Contract breach by Contractor, resulting in termination by the County, the County may procure the goods and/or services from other sources. If the cost for those goods and/or services is higher than under the terms of the existing Contract, Contractor will be responsible for paying the County the difference between the Contract cost and the price paid, and the County may deduct this cost from any unpaid balance due the Contractor. The price paid by the County shall be the prevailing market price at the time such purchase is made. This is in addition to any other remedies available under this Contract and under law.
13. **Disputes – Contract:**
- A. The Parties shall deal in good faith and attempt to resolve potential disputes informally. If the dispute concerning a question of fact arising under the terms of this Contract is not disposed of in a reasonable period of time by the Contractor's Project Manager and the County's Project Manager, such matter shall be brought to the attention of the County Deputy Purchasing Agent by way of the following process:
1. The Contractor shall submit to the agency/department assigned Deputy Purchasing Agent a written demand for a final decision regarding the disposition of any dispute between the Parties arising under, related to, or involving this Contract, unless the County, on its own initiative, has already rendered such a final decision.
  2. The Contractor's written demand shall be fully supported by factual information, and, if such demand involves a cost adjustment to the Contract, the Contractor shall include with the demand a written statement signed by a senior official indicating that the demand is made in good faith, that the supporting data are accurate and complete, and that the amount requested accurately reflects the Contract adjustment for which the Contractor believes the County is liable.
- B. Pending the final resolution of any dispute arising under, related to, or involving this Contract, the Contractor agrees to diligently proceed with the performance of this Contract, including the delivery of goods and/or provision of services. The Contractor's failure to diligently proceed shall be considered a material breach of this Contract.
- Any final decision of the County shall be expressly identified as such, shall be in writing, and shall be signed by the County Deputy Purchasing Agent or his designee. If the County fails to render a decision within 90 days after receipt of the Contractor's demand, it shall be deemed a final decision adverse to the Contractor's contentions.   - 1) Will receive a copy of the company's drug-free policy statement; and
  - 2) Will agree to abide by the terms of the company's statement as a condition of employment under this Contract.

Failure to comply with these requirements may result in suspension of payments under the Contract or termination of the Contract or both, and the Contractor may be ineligible for award of any future County contracts if the County determines that any of the following has occurred:

- 1. The Contractor has made false certification, or
  - 2. The Contractor violates the certification by failing to carry out the requirements as noted above.
15. **EDD Independent Contractor Reporting Requirements:** Effective January 1, 2001, the County of Orange is required to file in accordance with subdivision (a) of Section 6041A of the Internal Revenue Code for services received from a "service provider" to whom the County pays \$600 or more or with whom the County enters into a contract for \$600 or more within a single calendar year. The pricing quoted by the Contractor shall apply to serving the County's needs regardless of the circumstances. If the Contractor is unable to supply the goods/services under the terms of the Contract, then the Contractor shall provide proof of such disruption and a copy of the invoice for the goods/services from the Contractor's supplier(s). Additional profit margin as a result of supplying goods/services during an emergency or a declared disaster shall not be permitted. In the event of an emergency or declared disaster, emergency purchase order numbers will be assigned. All applicable invoices from the Contractor shall show both the emergency purchase order number and the Contract number.
  
17. **Errors and Omissions:** All reports, files and other documents prepared and submitted by Contractor shall be complete and shall be carefully checked by the professional(s) identified by Contractor as project manager and key personnel attached hereto, prior to submission to the County. Contractor agrees that County review is discretionary and Contractor shall not assume that the County will discover errors and/or omissions. If the County discovers any errors or omissions prior to approving Contractor's reports, files and other written documents, the reports, files or documents will be returned to Contractor for correction. Should the County or others discover errors or omissions in the reports, files or other written documents submitted by the Contractor after County approval thereof, County approval of Contractor's reports, files or documents shall not be used as a defense by Contractor in any action between the County and Contractor, and the reports, files or documents will be returned to Contractor for correction.

After receipt of a termination notice from the County of Orange, the Contractor may submit to the County a termination claim. Such claim shall be submitted promptly, but in no event later than 60 days from the effective date of the termination, unless one or more extensions in writing are granted by the County upon written request of the Contractor. County, in its sole discretion, may afford Contractor an opportunity to cure said default within a reasonable time.

Where Contractor is unable to certify to any of the statements in the written certification, Contractor must include a written explanation thereon for the County to consider. County shall have the right to refuse to enter into this Contract with the Contractor, or terminate this Contract if already entered into, if Contractor either fails to certify or certifies that it is subject of any debarment, pending debarment, declared ineligibility or voluntary exclusion from participation by any state or federal department or agency.

27. **Lobbying:** On the best information and belief, Contractor certifies no federal appropriated funds have been paid or will be paid by, or on behalf of, the Contractor to any person influencing or attempting to influence an officer or employee of Congress; or an employee of a member of Congress in connection with the awarding of any federal contract, continuation, renewal, amendment, or modification of any federal contract, grant, loan, or cooperative contract.

For breach or violation of this warranty, the County shall have the right to terminate the Contract, either in whole or in part, and any loss or damage sustained by the County in procuring on the open market any goods or services which the Contractor agreed to supply shall be borne and paid for by the Contractor. The rights and remedies of the County provided in the clause shall not be exclusive and are in addition to any other rights and remedies provided by law or under the Contract.

County agrees that it shall take appropriate action by instruction, agreement or otherwise with its employees or other persons permitted access to licensed programs and/or optional materials to satisfy its obligations under this Contract with respect to use, copying, modification and protection and security of licensed programs and optional materials.
32. **Software – Maintenance:** The correction of any residual errors in any software products which may be discovered by Contractor or by County shall be considered maintenance. Such maintenance shall be performed by Contractor without additional charge for the duration of this Contract. Suspected errors discovered by County in the software products shall be handled by the following procedure:
  - a. A listing of the output and a copy of the evidential input data in machine-readable format shall be submitted to Contractor along with a completed copy of the appropriate Contractor information form and, if appropriate, a listing of the contents of the memory of the CPU at the time the error was noted.

- b. Errors in the software product as verified by Contractor shall be corrected by providing a new copy of said software product or a new copy of the affected portions in machine-readable format. Contractor shall be available to assist County in isolating and correcting error conditions caused by County's particular hardware or operating system at rates specified in this Contract. If Contractor is called upon by the state to correct an error caused by County's negligence, modification by County, County-supplied data, or machine or operator failure or due to any other cause not inherent in the original software products, Contractor reserves the right to charge County for such service on a time and material basis at rates in accordance with the Contract.
- 33. **Software License:** Contractor hereby grants to County of Orange and County accepts from Contractor, subject to the terms and conditions of this Contract, a non-exclusive, non-transferable license until June 30, 2022 ("the License") to use the software products list in this Contract, hereinafter referred to as "software products." The License authorizes County to use the software products in machine-readable form on a single computer system, designated in writing by County to Contractor, provided that if the designated CPU is inoperative due to malfunction, license herein granted shall be temporarily extended to authorize County to use the software products in machine-readable form on any other County CPU until the designated CPU is returned to operation. By prior written notice to Contractor, County may re-designate the CPU in which the software products are to be used and must do so if the re-designation is permanent.

When encryption/CPU ID authorization codes are required to operate the software products, Contractor shall provide all codes to County with shipment of the software. In the case of an inoperative CPU, as defined above, Contractor shall provide a temporary encryption/CPU ID authorization code to County for use on a temporarily authorized CPU until the designated CPU is returned to operation. When changes in designated CPUs occur, Contractor shall issue to County within twenty four (24) hours of notification a temporary encryption/ID authorization code for use on the newly designated CPU until such time a permanent code is assigned.

- 34. **Software Installation:** The installation date for the software products shall be established in accordance with the provisions below:
  - a. If County elects to install the software products, County shall have thirty (30) days from the date of receipt of the software products to initially install and evaluate the software. The date of expiration of this period shall hereafter be known as the "installation date." Contractor shall be responsible for providing criteria and test data necessary to check out the software products.
  - b. If installation by Contractor is required by County, Contractor shall have up to thirty (30) days from the effective date of this Contract to provide initial installation and evaluation of the software products on County's designated CPU. Contractor shall issue written notice of the fact that the software products are operational, and the date of said notice shall be known as the "installation date." It shall be at Contractor's discretion to determine the criteria and tests necessary to allow Contractor to issue a notice to the effect that the system is operational.

County agrees to provide such access to its computer system as may be required by Contractor to properly install and test the software products. County further agrees to

provide, at no cost to Contractor, systems and production support as may be required by Contractor during installation.

If installation by Contractor is required by County, Contractor shall provide such installation on County's equipment at the rates specified in this Contract.

County shall designate the number of copies for production use and the number of copies for disaster recovery purposes and shall provide this information to Contractor.

If additional copies of such documentation are required, Contractor shall provide such manuals at the request of County. The requesting agency/department shall be billed for the manuals and any associated costs thereto by invoice. Contractor agrees to provide such additional manuals at prices not in excess of charges made by Contractor to its best customers for similar publications.

Contractor further agrees that County may reproduce such manuals for its own use in maintaining the equipment or software provided hereunder. County agrees to include Contractor's copyright notice on any such documentation reproduced in accordance with copyright instructions to be provided by Contractor.

37. **Software – Future Releases:** If improvement, upgraded, or enhancement versions of any software product under this Contract are developed by Contractor and are made available to other licensees for the duration of the License, they shall be made available to County at County's option, provided such versions are operable on the same computer hardware configuration.

Contractor shall provide each Contractor personnel with only such level of access as is required for such individual to perform his or her assigned tasks and functions. All County systems, and all data and software contained therein, including County data, County hardware and County software, used or accessed by Contractor: (a) shall be used and accessed by such Contractor solely and exclusively in the performance of their assigned duties in connection with, and in furtherance of, the performance of Contractor's obligations hereunder; and (b) shall not be used or accessed except as expressly permitted hereunder, or commercially exploited in any manner whatsoever, by Contractor, at any time.

County shall notify Contractor in writing reasonably in advance of any such designation becoming effective. Any such notice shall set forth in reasonable detail the enhanced security or access-control procedures, measures, or requirements that Contractor shall be required to implement and enforce, as well as the date on which such procedures and measures shall take effect. Contractor shall fully comply with and abide by all such enhanced security and access measures and procedures as of such date.

Each Party's personnel shall clearly identify themselves as the appropriate Party's personnel and not as employees of the other Party. When on the other Party's premises, each Party's personnel shall wear and clearly display identification badges or tags, as approved by the other Party.

### SCOPE OF WORK/PRICING

#### Project Goals and Objectives

CuraPatient is a Software-as-a-Service (SaaS) platform that helps individuals and providers engage with the patient's care experience before, during, and after a vaccination. The CuraPatient platform includes the complete feature sets and experience to manage the entire administration of the vaccines and builds on our work in the COVID-19 *Patient Under Investigation* (PUI) process. These features include the following:

- **Tracking:** With as many as eight different vaccines in development, and each vaccine involving a different care plan and dosage, it is critical that each vaccination is tracked and each patient gets the right vaccine at the right time.
- **Scheduling:** Unlike the traditional vaccine process, it is expected that the COVID-19 vaccine will be given not by your primary care provider, but instead by a pharmacy, urgent care, or other qualified healthcare provider. Our integrated platform allows the local community to screen and coordinate patients in advance to ensure a smoother front-line experience for both patient and provider.
- **Education:** The pandemic has created an overwhelming amount of information, and this can often lead to distrust and misinformation. CuraPatient will provide authoritative educational materials and content from federal agencies tailored to local audiences, increasing the public's confidence in the vaccine.
- **Vaccine Passports:** The vaccines, once administered, can be a tremendous enabler for reopening businesses and the economy. CuraPatient will provide proof of vaccination to patients in the form of a "passport". These can be validated by local businesses and allow for resumption of pre-COVID activities.
- **Public Health Analytics:** CuraPatient will provide timely analytics to ensure that vaccines are available and ensure accessibility to individuals based on the priority matrix as outlined by the federal government. Additionally, the efficacy of the vaccines can be further enhanced and better targeted to genotypes and socioeconomic environments.

- **Gateway to a Healthier Orange County:** This “last mile” effort can be the perfect first step to having residents of Orange County sharpen their focus on their healthcare. Future integrations with medical systems, healthcare apps (Apple Health, Map my Ride, Strava), and health technologies (FitBit, Peloton, Insulin Pumps, Smart Watches) will provide a foundation for better wellness outcomes. This crisis can and should be the catalyst for positive change for the residents of Orange County.

Additionally, our work with the Patient Under Investigation (PUI) process will be implemented in Phase One to support the existing testing network. This includes supporting patients before, during, and after their testing. The PUI process includes the following:

- a. **Before:** Find the appropriate testing site, trusted COVID-19 material (in the appropriate languages), and schedule a needed appointment.
- b. **During:** Ensure a smooth and efficient process to check-in and capture key information on testing and screening. This includes contact information, symptoms, and comorbidities.
- c. **After:** Support patients in keeping track of their symptoms, getting their results, and providing evidence in the form of a passport that they are negative and can confidentially re-enter the community. These patients can be transitioned to a waiting queue for vaccination once they become available.

### **Key Stakeholders**

The core functionality of the system is designed around connecting key stakeholders together to ensure that the vaccines are properly administered and that the local community can have confidence to safely reopen the economy. A critical aspect of the proposed platform is that it will be configured specifically for the COVID-19 vaccination use case. This brings a number of benefits to ensure the scale and precision of the solution, including benefits by Key Stakeholders:

1. **Patient :** Supports patients before, during, and after the vaccine protocol. Ensures that patients (and in the case of families, children and/or parents) are supported during the process. The patient experience is our most critical aspect. Our objective and

focus will be to create an integrated experience for patients before, during, and after their COVID-19 encounters including testing and vaccinations.

Our focus is to engage users to help them through this very difficult process while providing trusted information and insight on their care and the community around them. Just as importantly, our virtual caretaker keeps them engaged in their plan and allows patients to see how their care team is supporting them. In short, our solution was not only designed to ensure patients are engaged, but to also keep their caretakers engaged and accountable.

## Patient Experience

A virtual caretaker designed to accurately support patients through their vaccination journey and keep them connected

**Some key features include:**

- 1 Vaccination Screening & Symptom Assessments
- 2 Location-based Appointment Scheduling & Tracking
- 3 Appointment Alerting
- 4 Remote Monitoring with Device Sensors (Apple/Samsung Watch, Oura Ring etc)
- 5 Ongoing Connectivity with Care Team and Family

**Endorsed by **Operation Warp Speed** as the “Best Solution We Have Seen”**

2. **Providers:** Based on need and expected demand, the COVID-19 vaccine will heavily burden the current primary care delivery model. We need to be able to go directly to the public to educate, identify, and onboard enough qualified vaccination sites, as well as engage public interest. We also need to efficiently manage logistics for effective and optimized delivery of the proper vaccines.

# Provider Experience

A framework that focuses on forward-looking views, allowing for better insights and actionability. It enables providers to understand exactly how their day will go and who they will be seeing next.

Copyright © 2020 CuraPatient Inc. All Rights Reserved

- 1 **What's Next?**  
Understand exactly what type of vaccination your next appointment is for
- 2 **Accurate Planning**  
Ensure your days are scheduled around your exact hours of business and inventory status capabilities
- 3 **Administration-Focused**  
Streamlines vaccine administration and improves accuracy of dose distribution

With the scale and velocity of potential patients, care providers can easily be overwhelmed and patients can get lost in the system. Our Patient-as-a Project approach allows providers to properly screen, onboard, and treat patients using a prospective forward looking plan. This ensures that we can not only have visibility of our completed work, but more importantly, have control over the entire process.

3. **Public Health Agencies:** Public health agencies play a critical role in ensuring that local content and national data are properly correlated and appropriately deployed in the community. The CuraPatient platform allows for:
  - a. Integration of multiple vendors delivering critical testing services to the community into a single integrated platform that allows for better and more proactive targeting.
  - b. Content Curation: Providing information to create trust and confidence in the vaccine and the vaccination protocols. It is critical to begin this process immediately.

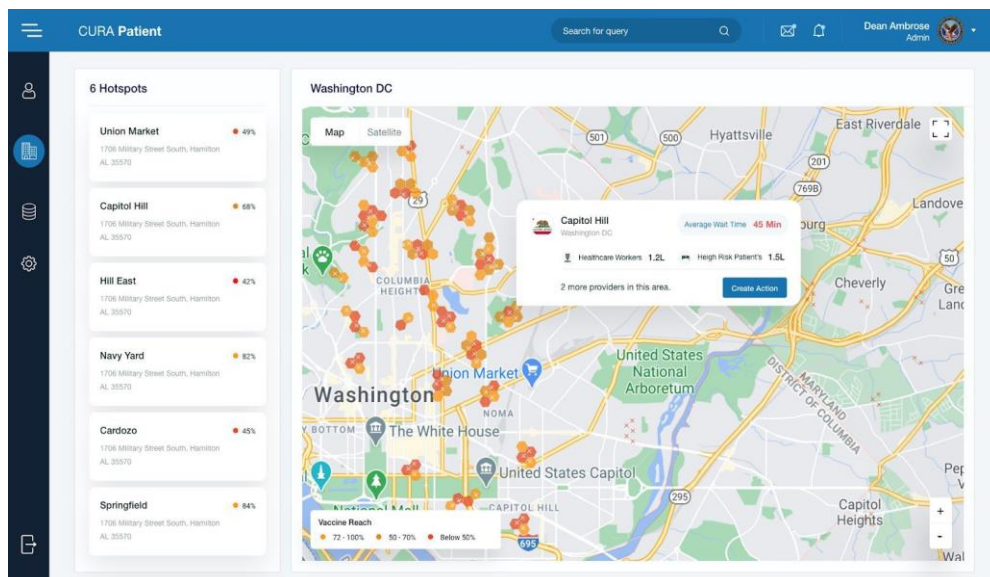

The screenshot shows the CURA Patient portal interface. A modal window titled "Add New Education Therapy Type" is open, allowing a user to add a new educational therapy. The form includes the following fields and options:

- Education Name:** A text input field containing "Keep Social Distancing".
- Change Photo:** A button to upload a new image.
- Thumbnail:** A small image of two people standing apart, representing social distancing.
- Pop. Age:** A dropdown menu set to "less than 18 years".
- Expiration Date:** Radio buttons for "Yes" and "No", with "No" selected.
- General Information:**
  - URL / Link:** A text input field containing "https://www.google.com/search?q=socid...".
  - Service Type:** A dropdown menu set to "Educational".
- Description:** A text area containing the text: "Seek immediate medical attention if you have serious symptoms. Always call before visiting your doctor or health facility. People with mild symptoms who are otherwise healthy should manage their symptoms at home."
- Tags:** A list of tags including "social distancing", "COVID-19", and "COVID-19".
- Save Education Therapy:** A blue button at the bottom right of the modal.

The background shows a sidebar with various educational therapy categories like "Managing Emotions", "Chemotherapy", "Cancer Prevention", "Coronavirus", "Bone Marrow", and "Basics of blood".

- c. Analytics: Effective reporting leads to necessary understanding of the current situation on the ground for both testing and vaccinations (vaccination rates, etc.), the availability of local vaccine providers, and the accessibility of vaccine supplies. Understanding the efficacy of each vaccine and how it impacts a particular audience is also a critical factor.

4. **Local Businesses:** Ensuring that communities and businesses can reopen is critical. Local businesses, including venues with large audiences (theme parks, theatres, restaurants, shopping centers, etc.), can confidently scan for validated passports. The CuraPatient platform is backed by our partners at Virtru and unlocks the power of our data by maintaining control.

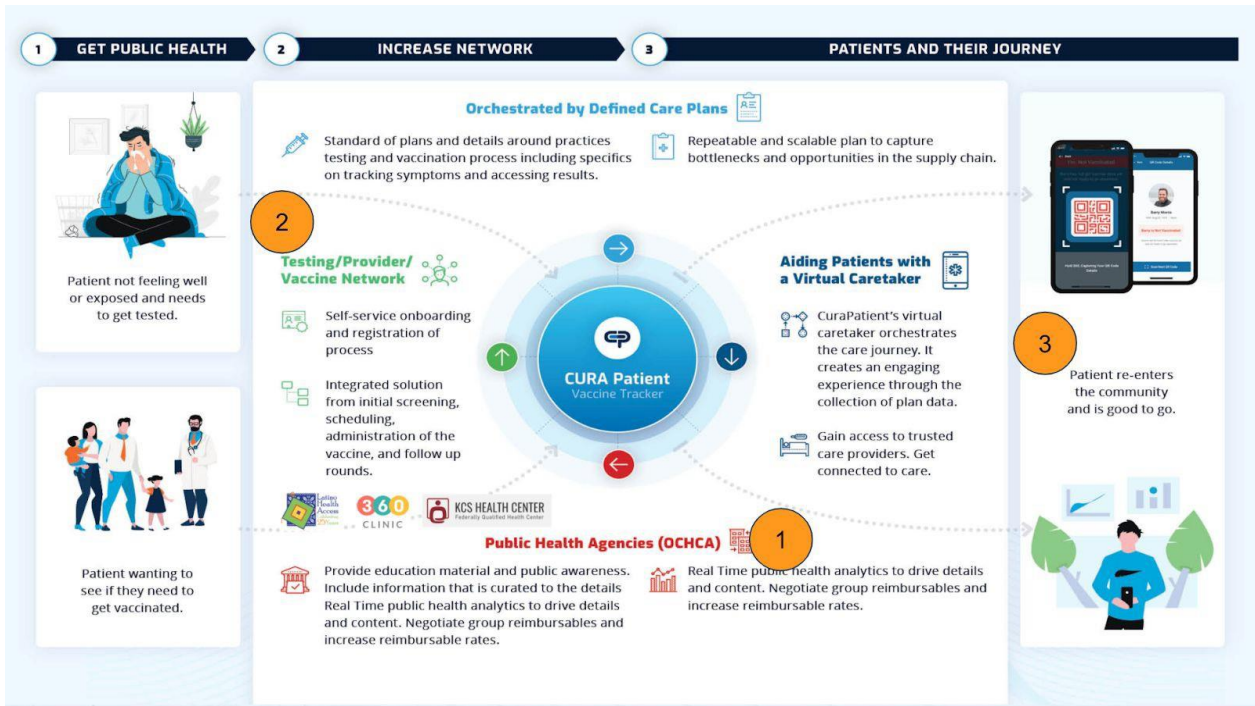

### Proposed Approach

While the vaccine is not expected to be available until later this year (or early 2021), there is the immediate need for information regarding the process and its efficacy and safety. This interlude will allow us to put in place the platform to ensure that we can administer the vaccine and coordinate the follow-up protocols. Our ready-to-use platform allows us to focus on the content and deployment of such a solution instead of the technical components.

In order to meet the time, budget, and on-going hosting and operating requirements highlighted in this document, we are proposing that we leverage the existing COVID-19 testing network and implement our CuraPatient Vaccine Tracker solution. The diagram below illustrates how we see bringing together key stakeholders into an integrated easy-to-use system. This will enable the testing partners to better

schedule, track, and deploy their resources while providing OCHCA with best real-time analytics to prioritize testing and community members that need it most.

1. Implement our SaaS-based CuraPatient platform. This is a secure full-feature solution designed to meet the requirements of OWS while supporting a broad range of users. The implementation is focused on onboarding the OCHCA team and includes the following:
  - a. Onboarding of OCHCA team and accounts.
  - b. Configuration of OCHCA sites and workflow content. This includes external providers and testing networks.
  - c. Making configuration changes for care plans by vaccinations, assessments, and educational content and information.
  - d. Creation of care plans for testing and Patient Under Investigation process. Incorporate community partners.
  - e. Training and change management on content creation, publishing, and content.

- f. Update branding and localized content.
- 2. Community rollout and engagement. Provide the existing testing partners and local community support with central platform that will provide for the following:
  - a. Engage existing COVID-19 Testing Network and Providers - Onboarding solutions at existing COVID-19 testing sites to expand engagement. Provide training and support to onboard and use standalone solutions.
  - b. Expand testing network to Covid-19 vaccination process with ability to queue those who receive tests for vaccination protocols once available.
  - c. Create a COVID-19 passport that can be made available for individuals in partnership with local and regional businesses. Integrate with state and OWS processes and to provide access to content for individuals.
  - d. Self-service registration process for healthcare providers who have the capability to efficiently and effectively dispense the vaccine.
- 3. Local Business for COVID Passport.
  - a. Provide a transactional platform for local businesses to scan and validate COVID Passports - including up-to-date vaccinations and recent test results.
  - b. Provide the public with vaccine access to secure, HIPAA-compliant data for access to public events.
- 4. Integration to supporting teams.
  - a. OWS and CDC reporting process.
  - b. Compliance Integration/testing to Local, State, and Federal resources as needed.
  - c. Provide an after-visit summary report to primary care providers for inclusion in patients' medical records.
  - d. Education curriculum and curation of material within the application The upcoming milestones and deliverables to be ready over the next quarter:
- a. Onboarding of testing networks to use solutions for testing and deployment

of community resources and existing testing partners.

- b. The availability of the CuraPatient platform for providers of the vaccinations. Engage with providers and model out the workflow of the vaccination before, during and after their vaccinations. This includes supporting both the patients as well as supporting providers to meet their compliance needs.
- c. The pre-marketing communication and PR around the upcoming vaccination process.
- d. The availability of a mobile app for the public for COVID-19 related testing and vaccinations.

**Investment:** This is a firm fixed price proposal to provide an end-to-end Software as a Service (SaaS) platform for COVID-19 testing and vaccination management which includes all costs associated with the implementation, compliance with state, local, and partner requirements, and full access to the CuraPatient feature sets as described above. It includes support and licensing for 2021 and 2022 expiring in January 1, 2023.

## 1 Overview

### **Security Requirements and Guidelines for Application Vendors and Application Service Providers**

This document provides a high-level overview of application security related guidelines and requirements set forth by the Orange County Health Care Agency (OCHCA), and applies to both software vendors for County-implemented applications and application service providers who provide hosted services.

These requirements and guidelines are consistent with regulatory privacy and security requirements and guidelines as well as supportive of OCHCA's position and practices on risk management in terms of appropriately safeguarding OCHCA's information assets.

The sections below are comprehensive and may apply in whole or in part based on specific implementation and scope of work. The expectation is that vendors will comply with relevant sections, as necessary. This information will be reviewed, validated and documented by OCHCA Security prior to any contract being finalized.

Vendors are required to comply with all existing legal and regulatory requirements as they relate to OCHCA's systems and data. Example of regulations, rules and laws include, but are not limited to, the Health Insurance Portability and Accountability Act (HIPAA), Senate Bill 1386, Payment Card Industry (PCI) Data Security Standards, and Sarbanes- Oxley (SOX). Vendors must also commit to ensuring compliance with all future local, state and federal laws and regulations related to privacy and security as they pertain to the application or service.

## 2 General Security Requirements

- The application/system must meet the general security standards based upon ISO 17799 – Code of Practice for Information Security and ISO 27799 – Security Management in Health Using ISO 17799.
- The application must run on an operating system that is consistently and currently supported by the operating systems vendor. Applications under maintenance are expected to always be current in regards to the current version of the relevant operating system.
- For applications hosted by OCHCA, OCHCA will routinely apply patches to both the operating system and subsystems as updated releases are available from the operating system vendor and or any third party vendors. The vendors must keep their software current and compatible with such updated releases in order for the application to operate

in this environment.

- Vendors must provide timely updates to address any applicable security vulnerabilities found in the application.
- OCHCA utilizes a variety of proactive, generally available, monitoring tools to assess and manage the health and performance of the application server, network connectivity, power etc. The application must function appropriately while the monitoring tools are actively running.
- All application services must run as a true service and not require a user to be logged into the application for these services to continue to be active. OCHCA will provide an account with the appropriate security level to logon as a service, and an account with the appropriate administrative rights to administer the application. The account password must periodically expire, as per OCHCA policies and procedures.
- In order for the application to run on OCHCA server and network resources, the application must not require the end users to have administrative rights on the server or subsystems.

### **3 Encryption**

- Application/system must use encryption to protect sensitive data at rest wherever technically possible (e.g. SQL TDE Encryption).
- All data transmissions must be encrypted using a FIPS 140-2 certified algorithm, such as Advanced Encryption Standard (AES), with a 128bit key or higher. Encryption can be end to end at the network level. This requirement pertains to any regulated data in motion such as website access and file transfers.
- All electronic files, where applicable, that contain OCHCA data must be encrypted when stored on any removable media or portable device (USB drives, CD/DVD, mobile phones, backup tapes). The encryption must be a FIPS 140-2 certified algorithm, such as Advanced Encryption Standard (AES), with a 128bit key or higher.
- All encryption methods used for data storage and transmission must be disclosed by the vendors.

### **4 Network Application Documentation**

- Vendors must provide documentation related to the configuration of the application including methods of secure implementation and port requirements.

### **5 Access Management**

- Application/system must control access to and within the system at multiple levels (e.g. per user, per user role, per area, per section of the chart) through a consistent mechanism of identification and authentication of all users in accordance with the 'Role Based Access Control' (RBAC) standard.
- Application/system must support measures to define, attach, modify and remove access rights for all classes of users.
- Application/system must support measures to enable and restrict access to the whole and/or sections of the technology solution in accordance with prevailing consent and access rules.
- Application must have the ability to create unique user accounts.
- Application must support session timeouts or automatic logoff after 20 minutes of inactivity.
- The application must provide functionality to automatically disable or lock accounts after 60 days of inactivity.

## 6 Password Management

- Application must support password management measures including but not limited to password expiration, account lockout and complex passwords.
- Passwords expiration must be set to 90 days and the system must prevent the use of the previous 4 passwords.
- Accounts must be locked after five unsuccessful login attempts.
- The password must be at least 8 characters in length and a combination of letters, numbers, and special characters with at least 3 of the four following categories.
  - ◆ Uppercase letters (A through Z)
  - ◆ Lowercase letters (a through z)
  - ◆ Numeric digits (0 through 9)
  - ◆ Special Characters (! @ # \$ % ^ & etc.)

## 7 Audit Capabilities

Auditing and logging capabilities will permit HCA to identify, and possibly reverse, unauthorized or unintended changes to application.

- Application must support the identification of the nature of each access and/or modification through the use of logging.
- Application must employ audit capabilities to sufficiently track details that can establish accountability for each step or task taken in a clinical or operational process.
- All audit logs must be protected from human alteration.

- Access to logs must be limited to authorized users.
- The application must employ basic query tools and reports to easily search logs.
- OCHCA record retention policies must be followed. [Currently OCHCA requires that this period be at least six years from the time the record was initiated.](#)
- Logging and auditing functionality must include the following:
  - ◆ Record of who did what to which object, when and on which system.
  - ◆ Successful/unsuccessful log-in and log-out of users.
  - ◆ Add, modify and delete actions on data/files/objects.
  - ◆ Read/view actions on data classified as restricted/confidential.
  - ◆ Changes to user accounts or privileges (creation, modification, deletion).
  - ◆ Switching to another users access or privileges after logging in (if applicable).

## 8 Protection from Malicious Code

- For cloud hosted solutions, vendors must utilize antivirus/antispyware software on servers and monitor to prevent malicious code which may lead to a compromise of OCHCA's data.
- For local hosted solutions, vendors must ensure that the application appropriately supports the use of antivirus/antispyware software.

## 9 Remote Support Functionality

- Provider must conform to OCHCA Vendor Remote Access Policy.

## 10 HCA Data Usage

- During the course of any implementation and subsequent support and life cycle management, any OCHCA data that the vendors have access to in any manner shall be considered confidential unless otherwise designated in writing.
- Vendors must not use or disclose OCHCA's data other than as permitted or as required by contract or law.
- The vendors must agree to use appropriate safeguards to prevent the unauthorized use or disclosure of OCHCA's data during any time that the data is stored or transported in any manner by vendors.
- After the end of any appropriate use of OCHCA's data within the vendors' possession, such data must be returned to OCHCA or securely destroyed unless otherwise permitted by contract or law.

## 11 Cloud Solutions

Application Service Providers hosting OCHCA data must meet the following additional requirements and are required to comply with and provide deliverables noted below:

- **SSAE 18.** SSAE 18 SOC 2 Type 2 or SOC 3 compliance certificate
- **Network Intrusion Detection and Prevention.** All systems that are accessible via the internet must actively use a network based intrusion detection and prevention solution.
- **Workstation/Laptop Encryption.** All workstations, laptops and mobile devices that process and/or store OCHCA data must be encrypted using full disk encryption that uses a FIPS 140-2 certified algorithm, such as Advanced Encryption Standard (AES), with a 128bit key or higher.
- **Jurisdiction and Location of OCHCA Data.** To protect against seizure and improper use by non-United States (US) persons and government entities, all data / information stored and processed for OCHCA must reside in a facility under the legal jurisdiction of the US.
- **Patch Management.** All workstations, laptops, and other systems that access, process and/or store OCHCA data must have appropriate security patches installed. Application Service Providers must utilize a documented patch management process which determines installation timeframe based on risk assessment and vendor recommendations. At a minimum, all applicable patches must be installed within 30 days of vendor release.
- **Application Access.** All systems accessible via the internet must employ security controls to prevent access to the application via an asset not approved or owned by the county.
- **Risk Assessment.** Application Service Providers hosting data for HIPAA covered services must conduct an accurate and thorough Risk Assessment as required by HIPAA Security Rule, Security Management (§ 164.308(a)(1)). Further, they must follow the risk assessment methodology, based on the latest version of NIST SP 800-30 ([http://csrc.nist.gov/publications/nistpubs/800-30-rev1/sp800\\_30\\_r1.pdf](http://csrc.nist.gov/publications/nistpubs/800-30-rev1/sp800_30_r1.pdf)). Upon request, the Risk Assessment findings and remediation strategy must be shared with OCHCA.
- **NIST.** To ensure compliance with HIPAA, Application Service Providers shall implement appropriate security safeguards by following National Institute of Standards and Technology (NIST) guidelines.

## 12 Policies

Vendors must have formal, published IT security policies that address how they manage and

maintain the internal security posture of their own or sub-contracted infrastructure. The vendor shall also clearly demonstrate that additional security features are in place to protect systems and data in the unique environment of the service provider model: namely, security issues associated with storing County-owned data on a remote server that is not under direct County control and the necessity of transferring this data over an untrusted network.

Vendors must provide, to the extent permissible, all relevant security policies and procedures to the County for review and validation. All documentation must be provided in electronic format for the County's review.

These policies must include, but not be limited to, the following:

- **IT Staff Usage Agreement.** All vendor employees performing services for the County must sign and agree to an IT usage agreement within their own organization as part of an overall security training and awareness program. At a minimum, vendor employees must sign a statement of understanding within their own organization regarding Internet dangers, IT security, and IT ethics and best practices,
- **IT Security Policies and Procedures.**
- **IT Operations Security Policy.** Written standards for operational security for any facilities where the County data, staff or systems shall exist. These documents must include, but not be limited to, physical security, network security, logical security, systems/platform security, wireless access, remote access, and data protections.
- **Data Management Security Policy.** Policy for the safeguarding and management of all data provided by the County or accessed by vendor as part of implementation and ongoing maintenance. This policy must, at a minimum, include check-in, check-out, copy control, audit logs and separation of duties.
- **Security Incident Notification and Management Process.** A detailed document that outlines the contact names and order and escalation of events that will occur in the case of a security breach concerning the  
  
County staff, data, or systems. This document must be updated immediately upon any change. The vendor shall be held liable to the time-tables and protections outlined in the document.

In addition to developing, maintaining, and enforcing the above named policies, the

vendor must:

- Bear the cost of compliance for any required changes to security infrastructure, policies and procedures to comply with existing regulations, unless such change is unique to the County.
- Comply with reasonable requests by the County for audits of security measures, including those related to identification and password administration.
- Comply with reasonable requests by the County for onsite physical inspections of the location from which the vendor provides services.
- Provide the County with any annual audit summaries and certifications, including but not limited to HIPAA, ISO or SOX audits, as applicable.
- Designate a single point of contact to facilitate all IT security activities related to services provided to the County, with the allowance of appropriate backups. Such contact(s) must be available on a 7/24/365 basis.

### **13 Business Continuity / Disaster Recovery Plans**

Application Service Providers must have a viable risk management strategy that is formally documented in a Business Continuity Plan (BCP) and/or a Disaster Recovery Plan (DRP). This BCP/DRP plan(s) must identify recovery strategies within the application service areas, outline specific recovery methods and goals, and provide the mutually agreed upon recovery time and point objectives.

### **14 Backup and Restore**

The vendor must provide their routine Backup and Restore policy and procedure which includes their backup data security strategy. These procedures shall allow for protection of encryption keys (if applicable) as well as a document media destruction strategy including media management tasks (i.e., offsite vaulting and librarian duties).

### **15 Staff Verification**

For any employee a vendor contemplates using to provide services for the County, the vendor shall use its standard employment criteria as used for similar services provided to other customers in evaluating the suitability of that employee for such roles.

At a minimum, subject to the requirements of applicable law, such criteria must include the information as outlined below for each employee:

- **Relevant Skills, Licenses, Certifications, Registrations.** Each service employee must possess the educational background, work experience, skills, applicable professional licenses, and related professional certifications commensurate with their position. The County may, at any time and at its sole discretion, request that the vendor demonstrate compliance with this requirement as applicable to the nature of the services to be offered by the vendor's employee. The County may, at its sole discretion, also request the vendor's certification that the vendor employee has undergone a chemical/drug screening, with negative results, prior to granting access to the County facilities.
- **Background Checks.** In accordance with applicable law, the vendor must, at the County's request, obtain as a condition of employment, a background investigation on any vendor employee selected to work for the County. The security and background investigation shall include criminal record checks, including records of any conviction in the U.S. or other relevant jurisdiction where the employee resides. Costs for background investigations must be borne by the vendor.

At a minimum, subject to the requirements of applicable law, the vendor must:

1. Ensure that all vendor service employees performing applicable services or supporting the vendor's duties and obligations under a County agreement: (i) have not been convicted of any crime involving violence, fraud, theft, dishonesty or breach of trust under any laws; and (ii) have not been on any list published and maintained by the Government of the United States of America of persons or entities with whom any United States person or entity is prohibited from conducting business.
2. Follow such verification procedures as may be reasonably specified by the County from time to time. If either the vendor or the County becomes aware that any vendor employee has been convicted of a crime involving violence, fraud, theft, dishonesty or breach of trust, or has been included on any such list of persons or entities convicted of such crimes, then the vendor shall promptly remove the employee from providing services to the County and prohibit that employee from entering any facilities at which services are provided.
3. Annually certify to the County that, to the best of its knowledge, none of the service employees have been convicted of any felony involving fraud, theft,

dishonesty or a breach of trust under any laws.

## **16 IT Physical Security and Access Control**

The vendor must establish processes and procedures for physical access to and control of their own facilities that are, at a minimum, consistent with relevant industry-specific best practices.

Vendor employees are expected to:

- Comply with facility access procedures, using procedures such as sign-in/sign-out requirements and use of assigned ID badges.
- Scan ID badges, where applicable, at any secure door and/or entrance and exit gates, including any door or gate that may already be open.
- Refrain from using recordable media in conjunction with County-owned equipment.
- Comply with check-in/check-out requirements for materials and/or equipment.
- Adhere to the facility's established emergency, safety and evacuation procedures.
- Report any unsafe conditions to the facility's safety representative.
- Report any access violations or security threats to the facility's local security administrator.

## **17 IT Security Compliance and Training**

The vendor must ensure that all vendor employees comply with security policies and procedures and take all reasonable measures to reduce the opportunity for unauthorized access, transmission, modification or misuse of the County's data by vendor employees.

The vendor must ensure that all vendor employees are trained on security measures and practices. The vendor will be responsible for any costs related to such training.

At a minimum, the vendor is expected to:

- Ensure that a formal disciplinary process is defined and followed for vendor employees who violate established security policies and procedures.
- Proactively manage and administer access rights to any equipment, software and systems used to provide services to the County.
- Define, maintain and monitor access controls, ranging from physical access to

logical security access, including a monthly review of vendor employees' access to systems used to provide services to the County.

The vendor shall monitor facilities, systems and equipment to protect against unauthorized access. At a minimum, the vendor is expected to:

- Monitor access to systems; investigate apparent security violations; and notify the County of suspected violations, including routine reporting on hacking attempts, penetrations and responses.
- Maintain data access control and auditing software and provide adequate logging, monitoring, and investigation of unusual or suspicious activity.
- Initiate immediate corrective actions to minimize and prevent the reoccurrence of attempted or actual security violations.
- Document details related to attempted or actual security violations and provide documentation to the County.
- Provide necessary documentation and evidence to the County in connection with any legal action or investigation.

## **18 Security Testing Recommendations**

The vendor should perform a series of steps to verify the security of applications, some of which are noted below. This section will not be validated by the County, but reflects best practices that the vendor should consider and follow.

1. Look for vulnerabilities at various layers of the target environment. In the lowest layer, the vendor's testing team should look for flaws in the target network environment, including any routers and firewalls designed to control access to the web server and related target components. The team should attempt to determine whether such filters provide adequate protection at the network layer of the target hosts that the team can reach across the Internet.
2. Look for flaws in the Internet-accessible hosts associated with the target infrastructure, including the web server. This host-based component of the test will analyze which network-accessible services are available on the target hosts across the Internet, including the web server process. The testing team should look for incorrect configuration, unpatched or enabled services, and other related problems on the target hosts.

This review performed by the vendor should include but not be limited to:

- The web application (i.e., the software that interacts with users at their web browsers; typically custom- crafted code created by the web development team)
- The web server application (the underlying software that sends and receives information via HTTP and HTTPS, typically off-the-shelf software such as Microsoft's IIS or the open-source Apache software)
- Any separate backend application servers that process information from the web application
- The backend database systems that house information associated with the web application.
- Infrastructure diagrams.
- Configuration host review of settings and patch versions, etc.
- Full code review.
- Identification and remediation of well-known web server, code engine, and database vulnerabilities.
- Identification and remediation of any server and application administration flaws and an exploitation attempt of same.
- Analysis of user interface, normal application behavior, and overall application architecture for potential security vulnerabilities.
- Analysis of data communications between the application and databases or other backend systems.
- Manual analyses of all input facilities for unexpected behavior such as SQL injection, arbitrary command execution, and unauthorized data access.
- Analyses of user and group account authentication and authorization controls to determine if they can be bypassed.
- Identification of information leakage across application boundaries, including the capability to enumerate other users' data and "show code" weaknesses that reveal internal application logic.
- Identification of areas where error handling is insufficient or reveals too much sensitive information.
- Identification of opportunities to write to the host file system or execute uploaded files.
- Identification of product sample files, application debugging information, developer accounts or other legacy functionality that allows inappropriate access.

- Determination as to whether or not fraudulent transactions or access can be performed.
- Attempts to view unauthorized data, especially data that should be confidential.
- Examination of client-side cached files, temporary files, and other information that can yield sensitive information or be altered and re-submitted.
- Analysis of encoded and encrypted tokens, such as cookies, for weakness or the ability to be reverse engineered.
